Supporting the national Greening Campaign for our regions

'Greening the Country, Community by Community'

During 2022 The Country House Company is supporting The Greening Campaign. This national campaign started in Petersfield and was designed and established to give communities the tools to be more sustainable in the face of climate change. It is about communities and landscape and as the campaign headline states,

"If we each make small changes to be greener and cleaner, those changes will add up to make a healthy, richer happier future."

The Greening Campaign provides the structure, resources and guidance to help individual towns and villages join together and work as a community to engage in helping the Climate Crisis.

Working with the support of councils, towns and villages are encouraged to work together in order to;

- Identify 5 significant changes that households can make to their lifestyle.
- To work as a community to protect the local environment.
- Make a vision for a sustainable community working on sections such as carbon reduction, communication, retrofit, saving water.

Ecology packs are provided that will help to evaluate the risks climate change will bring to the community.

Further details on The Greening Campaign can be found at www.greening-campaign.org
